Professional Summary

Computer science student focused on Python automation, local AI tools, and data analysis. Comfortable building small tools that solve real workflow problems.

Skills

Python, Pandas, CSV analysis, Markdown reports, Ollama, Prompt engineering, File automation, Git

Projects

Attendance Risk Detector: Built a Python tool that reads attendance CSV files, detects students below 75 percent, and generates teacher-friendly reports.

Local Study Planner: Created a script that converts syllabus text into a 7-day study plan and revision checklist.

CSV Insight Generator: Analyzed marksheet data using pandas and generated summary statistics and charts.

Education

B.Tech Computer Science Engineering, 3rd Year - ABC Institute of Technology. CGPA: 8.4/10.

Experience

Interned as a Python automation trainee. Automated folder cleanup, CSV validation, and weekly report generation for a small academic team.

Hackathon Fit

Interested in building local-first AI automation systems that read files, analyze data, and create useful reports without paid APIs.
