Professional Summary

Information technology student interested in education technology, document processing, and AI-assisted feedback systems. Strong communication and documentation skills.

Skills

Python, HTML, CSS, PDF reading, Technical writing, Data cleaning, SQLite, Basic machine learning

Projects

Assignment Feedback Assistant: Designed a prototype that reads student submissions and creates structured feedback with strengths and improvement areas.

Meeting Notes Generator: Converted raw meeting notes into action items, decisions, and follow-up agenda.

Resume Screening Prototype: Compared resumes with a job description using keyword overlap and generated a ranking report.

Education

B.Tech Information Technology, 3rd Year - XYZ College of Engineering. CGPA: 8.1/10.

Experience

Worked on a college documentation team. Prepared project reports, cleaned survey data, and helped build student-facing learning resources.

Hackathon Fit

Interested in building local-first AI automation systems that read files, analyze data, and create useful reports without paid APIs.
